

# Shivansh Verma

Agentic AI & Automation Engineer | Software Developer  
Noida, India | +91 7065595286 | shivansh.vrma.10@gmail.com  
linkedin.com/in/shivansh-verma-650a92222 | github.com/shivansh-verma13

## Professional Summary

Software developer with 2+ years of experience across full-time and internship roles, specializing in Agentic AI, conversational systems, and workflow automation. Developed conversational AI systems at EDMO for university use; reduced multi-agent response latency from 30-45 seconds to 4-10 seconds. Experienced in RAG, Vapi, Langfuse, prompt engineering, evaluations, and guardrails, with a strong foundation in TypeScript, front-end development, and API integrations.

## Technical Skills

**Agentic & Conversational AI:** Multi-agent systems, system orchestration, chatbots, voicebots, SMS bots, LLM integration, retrieval-augmented generation (RAG), prompt engineering, evaluations (evals), guardrails, Vapi, Langfuse  
**Front End:** JavaScript (ES6+), TypeScript, React.js, Next.js, Angular, Vue.js, HTML5, CSS3, Tailwind CSS, Redux  
**Back End & Automation:** Node.js, NestJS, Express.js, REST APIs, WebSockets, SQL, MongoDB, Slate CRM, workflow automation, API testing  
**Tools & Data:** Git, Docker, CI/CD, AWS, GCP, Azure, Cloudflare Tunnels, Electron.js, Databricks, Tableau, Scikit-learn, Pandas, NumPy

## Professional Experience

### Software Developer | May 2025 - Present

EDMO (iSchoolConnect), Noida

- Developed conversational AI systems, including chatbots, voicebots, and SMS bots, with multi-agent orchestration, used by CSU Global, PennWest, and WGU.
- Reduced multi-agent response latency from 30-45 seconds to 4-10 seconds; introduced interim conversational responses to keep users engaged while the system searched for information.
- Build retrieval-augmented generation (RAG) workflows and architect and test prompts to improve chatbot accuracy and contextual response quality.
- Develop voicebots with Vapi and use Langfuse for LLM observability; implement evaluations and guardrails to assess response quality and support reliable AI behavior.
- Engineer Angular and Next.js modules for 1,000+ users, optimizing Largest Contentful Paint and rendering through virtualization and iframe integration.
- Improved API response time by 25% through caching, query optimization, and modular architecture while integrating UI components with data services.
- Designed and automated Slate CRM workflows, reducing manual data processing by 40% and improving advisor productivity.
- Drive data-informed engineering decisions with Databricks and Tableau; lead code reviews and mentor engineering interns.

### Front-End Developer Intern | July 2024 - June 2025

SecureBlink, Noida

- Delivered Vue.js, Next.js, and TypeScript interfaces for 1,000+ users and cross-platform desktop functionality with Electron.js.
- Refactored legacy components and validated 50+ API integrations, reducing technical debt by 20% and improving application performance by 15%.

### Earlier Front-End and Software Engineering Internships | Sep 2023 - Nov 2023

PgVala and Hattyhood, Remote

- Built a React and FastAPI progressive web application with Cloudflare Tunnels and JWT authentication, increasing engagement by 20%.
- Delivered full-stack features using React, Node.js, and MongoDB, completing project milestones 10% ahead of schedule.

## Selected Projects

### AI Companion SaaS Platform | Next.js, Prisma, MySQL, Tailwind CSS, Stripe

- Built a subscription-based AI platform with secure billing, conversation history, and advanced filtering, increasing engagement by 25%.

### LLM Integration Engine (MERN-GPT) | React, Node.js, Express.js, MongoDB

- Built a full-stack conversational application with OpenAI GPT-3.5 Turbo, reducing query latency by 10%.

### Low-Latency Chat Application | React, Node.js, WebSockets, MongoDB

- Designed real-time WebSocket messaging with end-to-end latency below one second.

## Education

### B.Tech in Artificial Intelligence and Data Science | 2021 - 2025

University School of Automation and Robotics, GGSIPU EDC, Delhi | CGPA: 8.3

## Achievements

**1st Prize, iSchoolConnect Internal Hackathon (2025)** - led an intern team to deploy an AI solution; **Top 10/200, The Great Indian Hackathon (2023)** - competed as a web developer.
